

Relax... We've got you covered.

Finally A Solution For The Problems Associated With Equestrian Manure Bins!

BEFORE

Fly Trap™
NO FLY ZONE
The Fly Trap's Patent Pending System works for Patios, Garages, Equestrian Manure Bins, Restaurants and all Businesses with Insect-Related Problems.
Up To 80% Effective Against Flies!

AFTER

Keep The Breeze...Lose The Insects • Equestrian Fly & Insect Abatement
Solar Protection • UV Home Protection • Restaurant Pest Protection

The **Fly Trap** is a patent pending multi-level protection system that can reduce fly and insect populations and looks good doing it! The system is comprised of a motorized uv screen that can be enhanced with a time-release repellent, which together can reduce fly and insects up to 80%. The **Fly Trap** is available for insect protection, solar protection, UV protection and

heat protection. As business owners and horse enthusiasts we know the risks of fly borne equine disease, as well as the nuisance and odor problems associated with flies and other insects. We developed **Fly Trap's** patent pending multi-level protection system to be up to 80% effective and aesthetically pleasing for homeowners, HOAs and businesses alike.
